Early learning and primary school education program

The Begin Bright Green Level Numeracy E-book gives you a useful resource to use with your children at home. This is great support for a child who is attending the Begin Bright program to use as a consolidation tool. It is also a good resource to use if you are too far away from a Begin Bright centre and want to give your child some practice before they start 'big school'.

Green Level Numeracy e-book gives children worksheets for numbers 1 - 10 that you can print as many times as you wish to practice counting and writing correctly.
